

# Showcase of Excellence 2022

Our readers requested from us a special annual feature highlighting providers who offer quality products and services for private colleges and universities. This "Showcase of Excellence," which appears each year in our June issue, is filled with ads that present both case studies and product showcases from service and product providers exclusive to the higher education market.

These pages exhibit more in-depth information on these quality providers and their products, along with demonstrative case studies that will help administrators in higher education fulfill their mission of providing excellent experiences throughout their facilities. And—just as readers may face the challenge of not having enough time to communicate every single aspect of their higher learning meccas with students and communities—we were similarly limited by available space in this issue and could not include every single one of the companies that we know can help college and university decision-makers. Our hope, however, is that readers will enjoy the information that space allows us to include, and we know this information will help higher ed administrators continue to be successful in providing quality facilities and experiences to the many lives their colleges and universities touch.

# switch back M8RX™

From symphonies to soloists, Switch Back M8RX allows artists to perform live, record, and monitor their mix all in one compact Dante interface.

For over 20 years, Hear Technologies has designed innovative pro audio equipment for the music industry. The simplicity of our high-power, low-distortion personal monitoring systems makes getting the perfect mix quick and effortless.

# Game Ready

All-new for 2021, List Industries Inc.® is introducing its New Recruiter2™ Wood Sport Locker Quick-Ship Design lockers with modern contour edges and many included features.

Available in 24" Wide x 24" Depth x 84" Height and 30" Wide x 24" Depth x 84" Height, they can be ready to install in as little as two weeks.

Reinforce your commitment to your players and imagine the powerful impact a modern, luxurious and efficient locker room will have on your ability to recruit the best players to your program. List Industries has re-engineered the New Recruiter2™ Wood Sport Locker with sleek Quick-Ship Design. Their lockers bring an upscale and luxurious design to your locker room with a very reasonable life-cycle cost. They use the finest furniture-grade plywood to keep them looking like new year-in and year-out. Each locker is handcrafted by expert craftsmen using state-of-the-art equipment. The Recruiter2 locker is shipped fully assembled and ready to install upon delivery. Custom accessories are available to add to the player's enjoyment of their locker. The company's experts will help you throughout the entire process — from initial design to project completion.

List Industries has earned its slogan as America's Most Complete Locker Line by offering the largest selection of locker styles, materials, sizes, colors and functionality all while maintaining high standards of quality, customer service, packaging, and on-time delivery. They offer metal, wood, phenolic and plastic lockers; designed to serve the locker needs of any facility from health and sports clubs to schools and universities to professional sports arenas and stadiums.

For more information on List Industries Inc.® visit [listindustries.com](http://listindustries.com) or call 800-776-1342.

# HOPE'S®

For more than a century, Hope's has handcrafted the world's finest steel and bronze windows and doors, and we continue to refine the art that makes them the most sought-after and longest lasting windows and doors available. Hope's exclusive hot-rolled steel and solid bronze profiles replicate the traditional aesthetic of historic buildings while providing modern performance and efficiency. Hope's windows and doors are built to last a lifetime and beyond – sustaining their beauty and performance for generations. [HopesWindows.com](http://HopesWindows.com)

HOPE'S WINDOWS, INC. — EST. 1912 — JAMESTOWN, NEW YORK

UNIVERSITY OF SOUTHERN CALIFORNIA SCHOOL OF CINEMATIC ARTS  
PRODUCTS SHOWN: Jamestown175™ Series steel windows and doors

ARCHITECT: Urban Design Group  
PHOTOGRAPHER: John Linden

# SCHOOL OF CINEMATIC ARTS

UNIVERSITY OF SOUTHERN CALIFORNIA

Hope's handcrafted steel windows and doors were installed in the School of Cinematic Arts – a four-acre complex of six buildings at the University of Southern California.

When acclaimed filmmaker George Lucas made his donation—the single largest gift in the university's history—he specifically requested the new campus for the School of Cinematic Arts reflect the historic Southern California Mission style prevalent in 1929, the year USC adopted film studies as part of its curriculum.

“The university is very pleased by the elegant look realized by the quality of Hope's steel windows and doors,” says Carter Moore, an architect with Urban Design Group of Dallas, who worked on all three phases of the project and served as project manager for the final phase. Prior to each construction phase, the design team and contractor traveled to Hope's factories in Jamestown, NY to review how Hope's handcrafts its hot-rolled steel windows and doors.

“A high-profile project like this, which must satisfy some of the most creative minds in the world, received tremendous attention to detail. There's no doubt we will be using Hope's again in future projects.”

— Carter Moore, Architect  
Urban Design Group

In addition to providing an elegant aesthetic, Moore says the durability of the Hope's products enabled the team to achieve another design objective: create buildings that would last for generations.

Hope's Jamestown175™ Series hot-rolled solid steel windows and doors were installed in all three phases. The project included about 200 arched and rectangular windows. Moore indicated that the design team was impressed with the structural strength the thin profiles can achieve.

The 200,000-square-foot space in the new complex offers courses in traditional film and television, but also animation, interactive, video games and other technologies. The buildings feature high-tech classrooms alongside Tuscan-inspired belvederes, interior courtyards, tile roofs and wrought iron gates.

## HOPE'S®

(716) 665-5124

**Hope's® Windows, Inc.,**

based in Jamestown, NY, is the nation's leading and most experienced manufacturer of custom designed, solid hot-rolled steel and solid bronze window and door systems. Specializing in historic preservation, cultural, institutional, and commercial, applications, Hope's help architects achieve the most technically challenging design visions with unlimited shapes and sizes. Hope's advanced finishing system ensures that all Hope's steel windows and doors last longer than any other available, even under the most extreme environmental conditions.

Since 1945, Musson Rubber has been a pioneer and leader in the development, manufacture and distribution of safety stair coverings and flooring materials. Musson Rubber specializes in stair coverings and entrance matting for commercial, institutional and industrial use. Our website contains the most complete and comprehensive line of top quality rubber and vinyl stair coverings and entrance mats for use in public buildings. We have been involved in general production, maintenance, MRO applications, and we have been working with our customers and suppliers throughout the region for over 70 years. **Musson Rubber is your source when you need reputable products from top suppliers and trusted service.**

#### MAKE STAIRS & LANDING SAFE WITH MUSSON VINYL TREADS & TILE

- Excellent for commercial, industrial, and institutional use
- Vinyl treads are available in four colors and a variety of sizes and styles
- Contrasting 18"x18" vinyl tiles have a durable 40 mil wear layer
- Matching cove risers are also available.

#### RUBBER SPORT FLOOR

- Durable spike resistant flooring
- Made of recycled rubber combined with color flecks of new rubber
- Available in roll goods, blue down, or interlocking tiles in a variety of colors

#### RECYCLED ENTRANCE MATTING

- Made of recycled PVC plastic
- Brushes off sand, dirt, and slush from shoes and carts
- Open grid drains away water and debris
- Snap together tiles are easy to install and replace
- Use in recessed areas or surface with beveled edges

#### LVT TILE WITH 40 MIL WEAR LAYER

The extra-thick helps to combine the beauty and feel of antique wood with the durability required for high-traffic applications. These planks are easy to maintain; there are no waxes, sealers, or other finishes required which reduces labor and chemical costs. Available in 7 seasoned wood patterns.

# We're Still Listening.

**Water professionals know** that swimmers demand clear and clean water. That's why we continue to work hard to make your job easier. Make chlorination easy with the **ACF Series** Calcium Hypochlorite Feeders.

**Clarify with Vantage Poly-A Clarifying Tablets.** This unique and powerful tablet water clarifier is not just to clear up cloudy water after a long weekend. As a maintenance product, it works with your filtration system to remove organic and inorganic compounds to prevent dull and cloudy water.

## SANITIZE with the **ACF Series** Calcium Hypochlorite Tablet Feeders

- ⌘ Safer than liquid systems
- ⌘ Runs "Clean" - Less Maintenance!
- ⌘ Simple, Efficient, and Durable
- ⌘ Systems available for ANY size pool
- ⌘ NSF/ANSI Standard 50 Certified

## CLARIFY with the **VPF-20** Poly-A Tablet Feeder

- ⌘ Unique tablet clarifier
- ⌘ Easier than liquid systems
- ⌘ Removes organic and inorganic compounds
- ⌘ Increases filter effectiveness
- ⌘ Proven cryptosporidium removal

# Beautiful Pool Water has never been this easy...

## ..until now.

Introducing the

## **VANTAGE<sup>®</sup>** **ACF Series** Calcium Hypochlorite Tablet Feeders

- ⌘ Unmatched water quality
- ⌘ Safer than liquid systems
- ⌘ Runs "Clean" - Less Maintenance!
- ⌘ Simple, Efficient, and Durable
- ⌘ Systems available for ANY size pool
- ⌘ NSF/ANSI Standard 50 Certified
- ⌘ Uses VANTAGE Calcium Hypochlorite Tablets
- ⌘ Majority of Parts are Interchangeable

Thanks in no small part to your input, our introductory ACF-60 model feeder received excellent reviews from the field. So good, in fact, that facility managers and operators, builders, and designers requested the same simplicity of design, reliability and ease of operation in both smaller and larger capacity feeders. Again we listened, and the result is the ACF-18 for commercial systems under 50,000 gallons, and the ACF-250 for systems up to 1,000,000 gallons of water. All three Vantage feeders are NSF/ANSI Standard 50 certified.

A complete line of chemicals, including our unique Poly-A Tablets is available.

# PREMIER LEARNING ENVIRONMENTS

## **GROWSPAN GREENHOUSE STRUCTURES**

For over 40 years, GrowSpan has been helping colleges, universities and school systems create custom greenhouses tailored to their curriculum. These greenhouses provide students with hands-on experience in a commercial grow and ensure research institutions have a top of the line growing structure with complete environmental control. GrowSpan offers Dutch- and venlo-style structures, so users can take advantage of cutting edge technology and provide a learning experience of the highest caliber.

## **THE GROWSPAN GREENHOUSE ADVANTAGE INCLUDES:**

### **BUILD TO ANY SIZE**

Cover multiple acres with one structure

### **VERSATILE CLADDING**

Meet the need of any region

### **ENGINEERED SOLUTIONS**

Grow in any region year-round

### **COMPLETE ENVIRONMENTAL CONTROL**

Energy-efficient systems available

### **GREENHOUSE SPECIALISTS ON STAFF**

Get invaluable design advice

### **ONE-STOP SHOPPING**

Everything needed to teach and grow

GrowSpan staffs industry-experienced professionals to design their greenhouse structures. Each customer works with a GrowSpan Greenhouse Specialist to ensure the structure not only meets their exact needs, but also exceeds them. They provide invaluable design advice, and can create greenhouse systems that produce high-end crops and also save the user money on a daily basis.

## AIRFLOW MANAGEMENT

### **KMC**Conquest™ Airflow Measurement System

The patent pending KMC Conquest Airflow Measurement System is a **revolutionary approach to measuring outside airflow.**

The System can be applied to a wide range of mechanical systems, including **unit ventilators, packaged rooftops, complex built-up air handlers and custom-built equipment.**

The KMC Conquest AFMS **programmatically characterizes system performance during commissioning, leveraging the same methods as a TAB technician.**

After commissioning, integrated equipment control and system diagnostics are provided to **routinely monitor and**

#### **report performance.**

Based on ASHRAE standards 62.1, 111, and 189.1, the System uses a **characterized system method** to measure outside, return, and supply airflow.

Using a high precision inclinometer to monitor outside air damper blade position, performance is **not impacted by ambient air, wind gusts, low air velocities, airborne pollutants, turbulent airflow, duct bends, restrictions, or any of the other traditional pitfalls common to traditional airflow measurement technologies.**

Embedded performance diagnostics **monitor system performance to ensure accuracy of readings.**

# KÄRCHER

## CUTTING-EDGE AI TECHNOLOGY FUSED WITH TIMELESS FLOOR CARE EXPERTISE

The next generation of Kärcher floor machines is here –KIRA. KIRA is an acronym for Kärcher Intelligent Robotic Applications, and the KIRA CV 60/1 was the first autonomous product to be launched from this line in the United States, with the B 100 R launching earlier this year.

### Value and Intelligence

Powered by BrainOS®, these machines safely navigate around people and obstacles via advanced artificial intelligence (AI) and a robust sensor system. The intuitive interface allows workers of any technical ability to easily teach and run cleaning routes.

These intelligent tools help organizations use their cleaning staff more efficiently and reduce opera-

tional costs while solving for labor shortages. The KIRA B 100 R robotic scrubber handles the tedious assignment of cleaning floors all on its own, so staff members can focus on higher value tasks, providing a significant return on investment to customers.

### A Helpful Tool for Large Institutions

In addition to machine capabilities, fleet management tools provide operators and managers with key insights into performance metrics so robotic operations can be tracked, verified, and improved. Through a continuous innovation cycle, and regular software updates, the experience using any KIRA machine gets even better over time.

### Kärcher's Simple Innovation Philosophy

Innovation is what benefits people. We are perfectionists, always rethinking systems and designs. We have the courage to break new ground and the conviction to do things instead of just talking about them. This philosophy results in solutions with convincing performance, quality and handling that are one step ahead of the market. Because for us, cleanliness is the best challenge in the world. This is what we work toward. Every day.

Visit [www.karcher.com/us](http://www.karcher.com/us) for more information.

# KÄRCHER

# AUTOMATE AND CONQUER.

The KIRA CV 60/1 robotic vacuum and KIRA B 100 R robotic floor scrubber can help increase your cleaning productivity. Designed to be easily operated and trained to clean specific areas or routes quickly, efficiently, and autonomously without technical know-how. Free up your team for other tasks and see significant improvements in cleaning consistency and coverage – even when you're not around. [karcher.com/us](https://www.karcher.com/us)

[aiphone.com](http://aiphone.com)

# You have decided your campus needs a new security plan or an update to an existing one.

## Where do you begin?

### Determine Needs and Expectations

Any project will go much smoother when there is an early agreement from

campus decision makers. Talk with top administrators and the IT group to determine needs, existing capabilities, and expectations. Don't forget the faculty, campus staff, security personnel, students, and parents too. They will live with the plan every day and likely offer valuable insight. Consider reaching out to your local first responders too. They are another great source of security information.

The support of these groups is critical, so keep them regularly updated as the plan is implemented. You want to get things done right the first time. Since most campuses are working with limited financial resources, effort in the early stages could help save time and money during the run of the project.

### Tailor a Plan

With input from your top stakeholders, you're ready to start thinking about

equipment, budgets, and new policies. But security is not sold as an off-the-shelf, one-size-fits-all plan. This means you will likely be working with a security integrator to tailor a plan specifically for your campus.

### Get Best Practices from Experts

Curated from school industry and security experts, our Campus Security eBook helps guide you through the best practices for keeping students and your schools safe. Our in-depth guide includes considerations you want to factor in when outlining a plan. From assessing risk to choosing an integrator, you will find our free eBook a useful resource.

# VENT TO PREVENT CORROSION

## PURGE<sub>n</sub>VENT™

### Air Venting Valves

NFPA 13 requires the addition of an air vent on each wet pipe fire sprinkler system that utilizes metallic pipe to help mitigate internal pipe corrosion. PURGE<sub>n</sub>VENT valves come in a variety of styles. The 7910MAV is a manual air vent that has the smallest footprint on the market. The M7900AAV features a 7900V automatic air vent that releases excess air while the system is in operation. It also includes an isolation valve and purge valve. The purge valve helps air exit the system faster when filling, and it can be used as a vacuum break when draining the system. The vacuum break helps the system drain faster and protects gaskets from being dislodged on other system components when draining. The M7930ECA includes a pipe cap for easy installation, and the M7950ILV features an air separation chamber that installs into the main branch line for applications with difficult to reach system high-points.

## FLOODELIMINATOR

- Stops Flooding due to Frozen, Vandalized, or Improperly Maintained Fire Sprinkler System Auxiliary Drains
- For Dry and Pre-Action Fire Sprinkler Systems
- Compatible with Compressed Air and Nitrogen Systems
- No Power Required
- Automatically Resets
- Allows Condensation to be Drained Normally
- Retrofit onto Existing Auxiliary Drains
- Made in the USA

ULTRA COACHLINER™

THE ULTRA COACHLINER DXL™ is the industry leader. This front engine motorcoach has the smooth ride, capacity and luggage space of a traditional coach bus, at only HALF THE COST to own and operate.

CUSTOMIZE YOUR COACHLINER  
[coachliner.com](http://coachliner.com)

Starting at \$2975 Per Month

\*20% Down. 4.5% APR for 84 Months with \$40,000 Balloon Payment or Walk Away at End of Lease. Pricing based on SE 102.

FEATURES

SEVERAL MODELS AVAILABLE

- AirGlyde Air Ride Suspension Systems
- Comparable to Motorcoach Storage (556 Cubic ft.)
- Seats 42-56 or 54 with Lavatory
- High Comfort Premium Seating
- Cummins 9L Diesel
- HD Arctic Plus A/C (Industrial Grade Compressors)
- USB/110V Outlets & REI Video
- Premium Sound Abatement Package
- Full Composite No Wood Construction
- Alcoa Aluminum Alloy Wheels
- Pinnacle Premium Air Ride Driver's Seat
- Duraguard+\* Fire Resistant Anti-Mold/Mildew Floor
- Precision Reinforced Steel Cage
- Ride Control Stabilization System
- 102" Wide
- Optional LED Headlights
- Optional Boosted Premium Sound System
- Optional O<sup>2</sup> Safe Technology Clean Air System
- White Glove 24/7 Support & Assistance Program

## All-in-one Moisture Measuring Tool Kit

Our Recommendation

### Ligno-VersaTec: All-in-one:

#### Pin - Pinless - RH

Anyone needing a versatile, accurate moisture meter will appreciate the multi-function Ligno-VersaTec and its absolute reliability for many years of usage.

With the Ligno-VersaTec, you can select the right measuring mode and the right accessories for the job on hand. This could be tracking moisture problems with the pin electrode or measuring humidity in a crawl space with the precision RH Bluepeg probe. Cupped Floors could be checked using the pinless mode. Pinless search and compare mode could be used for tracking moisture problems after water damage.

### From Lignomat

A trusted name in the industry.

Reusable, removable Concrete Probes

Dual-depth Pinless Meter for Wood and Concrete

Selection of Pin Probes

## Elastomeric Waterproofing

SubSeal is a one-part, ready-to-use elastomeric waterproofing membrane designed for interior and exterior substrates that require waterproof protection. It also functions as a sealant, stand-alone crack suppressant and moisture barrier for hard surface, resilient and wood flooring.

Versatile and flexible, SubSeal bonds to wood or concrete substrates, metal drains, PVC, ABS fixtures, stainless steel, concrete backer board and more, while featuring simple application, fast drying and same day tile installation.

Easily applied with a trowel, brush, roller, or air less sprayer, SubSeal bonds to the substrate with superior adhesion and meets ANSI method A118.10 for thin-bed, load bearing waterproofing membranes. SubSeal cures to form a thin, flexible layer that is an impervious water barrier and provides superior waterproofing protection on the floor, at floor-to-wall and wall-to-wall joints, drains, protrusions, and all perimeters.

As a liquid crack suppressant, SubSeal will protect for up to 1/8" of lateral substrate movement. It may also be used with sheet-applied membrane systems providing extra protection for joint, seam and corner applications, in addition to shower pans, shower walls, exterior decks, balconies and other areas requiring waterproof protection.

SubSeal eases application in hard-to-reach areas, allows for same day flooring installation and can be flood tested in less than 24 hours.

SubSeal contains no VOCs and is certified Clean Air GOLD, conforming to the California Department of Public Health (CDPH) Standard Method v1.2 for Private Office, School Classroom and Single-Family Residences. It is the perfect solution for schools, apartments, condominiums, multi-level hotels, high-rise office buildings, and other areas needing sound reduction.

Find out more at [www.nacproducts.com](http://www.nacproducts.com).

Easy application with trowel, brush, roller or airless sprayer

# Air Filtration: Your next Energy Conservation Measure?

The Dynamic V8 Air Cleaning System offers sustainable MERV15 performance for better IAQ, using 2/3 less fan energy than MERV14 filters and removing odors, VOCs and ultrafine particles without Ozone. The Dynamic V8 also offers average maintenance intervals exceeding four (4) years.

The Dynamic V8 can cut fan energy costs in half. And additional substantial savings may be available through reduction of ventilation air requirements using the IAQ Procedure in ASHRAE Standard 62. The IAQ Procedure allows recirculated indoor air to be cleaned rather than supplemented

with outdoor air that requires heating or cooling. Schools can achieve higher rates of air filtration with much lower pressure drop, allowing HVAC systems to operate at lower brake horsepower than comparable conventional air filtration systems.

*Visit [DynamicAQS.com](http://DynamicAQS.com) or ask us about a free Life Cycle Cost Analysis to find out how much you can save on fan energy and maintenance costs.*

## Challenge:

Incorporating innovative, state-of-the-art sustainable technologies to optimize comfort and indoor environmental quality while keeping long-term operating costs to a minimum.

### Worcester Polytechnic Institute Sports & Recreation Center

This award-winning facility has been credited as being one of the greenest sports centers in the nation.

WPI Sports & Recreation Center is an environmentally friendly facility containing a 38-meter pool, a fitness center, a four-court gymnasium, an indoor running track, rowing tanks, racquetball and squash courts, dance studios, and offices and meeting spaces for the coaches and staff. The center is home to the wrestling team as well as the practice facility for men's and women's rowing and varsity team training.

Sustainability is important to WPI which boasts several LEED certified facilities on campus. The school has a broad reaching sustainability planning process which includes students as well as faculty. Faculty members have incorporated sustainability into many student projects and focused on various aspects of sustainability around the world. In 2012 alone, some fifty-one energy-related projects were completed at the school.

### Acoustic Doors

#### Metal

- Metal Swinging Doors
- Fixed Window Systems
- STC ratings from 43 to 57
- Available with up to 3-hour fire labels

#### Wood Finish

- STC ratings of 43 through 50
- Dual-glazed Vision Lights
- Wood veneers and plastic laminates
- 3/4 hour and 20 minute fire labels

### Bullet-Resistant Doors

#### Metal

- Weapon Protection Levels 1-8
- UL Standard for Safety 752
- Fixed and Teller Window Systems
- Pass-Throughs, Gun and Voice Ports

#### Wood Finished

- UL Standard for Safety 752
- Weapon Protection Levels 1-8
- Single or pair configurations
- Wood veneers and plastic laminates
